

Welcome everyone! As you watch today's presentations, feel free to comment or share resources in the chat and ask questions in the Q&A box. We will have time for an interactive Q&A at the end of the day today and look forward to a day of great talks!

From Kate Lundquist to Everyone: 12:59 PM

Hi everyone and welcome! We will get started in a minute!

From Jackie to All Panelists: 01:02 PM

Thanks panelists for being here! We are super excited to hear all of your presentations. We will be getting questions in the Q&A and in the chat, feel free to chime in by typing in your answers. We will have time for a more extended Q&A at the end of the day!

Additionally, please double check your name. If your name says Troi, please change it to your real name so we can know who you are! Thank you

From Jackie to All Panelists: 01:09 PM

Some participants are reporting the sound as being quiet, is the sound coming through okay for you all? Everything sounds good to me.

From Kate Lundquist to All Panelists: 01:09 PM

Sound is fine for me.

From Betsy Stapleton to All Panelists: 01:09 PM

It sounds ok tome.

From Kate Lundquist to All Panelists: 01:09 PM

I'm wearing headphones though

From Betsy Stapleton to All Panelists: 01:09 PM

I'm not, and I can hear Brock fine.

From Jackie to All Panelists: 01:09 PM

Thanks

From Bob Pagliuco to All Panelists: 01:10 PM

Sounds good through my computer speakers

From Kate Lundquist to All Panelists: 01:10 PM

Tell them to check their audio settings under Zoom preferences

From Jackie to Everyone: 01:11 PM

Thanks everyone for attending today's session! We are very excited for today's great talks. If you are having any trouble hearing the presentations, please check your zoom preferences. If changing your settings does not help, you can always call in via phone using the information on your webinar registration.

From Brock Dolman to Everyone: 01:17 PM

Mystery Science program for online learning has a wonderful short lesson for 4th & 5th graders - Search for:

Why Beavers Build Dams

<https://mysteryscience.com/mini-lessons/beavers-dams?code=f8a55cd87b4fd5a200da10f870a571ec#slide-id-10965>

From Kate Lundquist to Everyone: 01:44 PM

Great talk Emily!!!

From Kevin Swift to All Panelists: 01:45 PM

Wow, wow, wow. Emily, that was amazing! Love it, thanks so much for presenting all that.

From Heidi Perryman to All Panelists: 01:58 PM

Has chat stopped?

From Kevin Swift to All Panelists: 01:58 PM

I saw that

From Kate Lundquist to Everyone: 01:59 PM

Hello Attendees, are you able to see the chat?

From Kate Lundquist to All Panelists: 02:00 PM

I looks like there is an allow button on the chat...do we want them and mine currently says attendees can chat to no one. Should we change that to Attendees and panelists?

From Jackie to All Panelists: 02:00 PM

Sounds good

From Kate Lundquist to All Panelists: 02:00 PM

Done

From Kate Lundquist to Everyone: 02:00 PM

Hello all, is the chat back?

From Theresa Kunch to Everyone: 02:01 PM

yes

From Irma Lagomarsino to Everyone: 02:01 PM

We can now! Thank you!

From Charisse Matisz-Cordero to All Panelists: 02:01 PM

yes

From Kate Lundquist to Everyone: 02:01 PM

Apologies. Somehow it got disabled...beavers in the machine?

From Kevin Swift to Everyone: 02:02 PM

Haha - they're chewing the wires and piling them up behind the firewall to keep it from burning...

From Irma Lagomarsino to Everyone: 02:03 PM

Remarkable indeed! Beaver dam ponds as a refuge for firefighters! Wow!

From Stuart Suplick to All Panelists: 02:03 PM

Agree with Kate, that was awesome as usual, Emily! And absolutely, beavers logged in somehow

From Ariel Greenwood to All Panelists: 02:04 PM

Fascinating, thank you!

From Kate Lundquist to Everyone: 02:12 PM

Chat should be working again. Please let us know if it is not. Thanks!

From Joe Wheaton to Everyone: 02:20 PM

We're seeing all sorts of awesome examples of beaver and LTPBR projects. Yet, there are only 3 projects (from Kevin Swift thanks) shown in California. I know there are more than that. Please share your efforts by posting your projects and get them "on the map" in the LTPBR Explorer: <https://bda-explorer.herokuapp.com/>

From Daniel Logan to Everyone: 02:22 PM

So they knew back in the 1940s that adding beavers back to meadows were beneficial for temporary water storage? Curious and interesting!

From Kate Lundquist to Everyone: 02:22 PM

California relocated 1,221 beaver from 1923-1950

From Kevin Swift to Everyone: 02:22 PM

Oh man, busted! Sorry Joe—I've got 12 more to put on there, and meant to get on it sooner. You want the 3 in Nevada, or should I not admit I'm poaching your territory?

From Heidi Perryman to Everyone: 02:23 PM

They knew before that!

From Kevin Swift to Everyone: 02:23 PM

Haha! I love it—such a small world.

From Joe Wheaton to Everyone: 02:23 PM

Lets see 'em all. Thanks Kevin! I claim no territory ;). We need all hands on deck.

From Andrea Claassen to All Panelists: 02:24 PM

Question for Joe Pagliano: Is there a contact for the BDA technical team?

From Nina Hemphill to Everyone: 02:27 PM

Bob BLM will be building BDAa in the Arcata area so you should be able to look at those once they have built them. I think some are for the Mattole River

From TroiCarleton to All Panelists: 02:28 PM

bob.pagliuco@noaa.gov for more info on BDA tech team

From Kevin Swift to All Panelists: 02:31 PM

Bob, you rocked it!! Thanks for putting it all together, that's super exciting.

I really, really like the passage data, I hadn't seen that before.

From Bob Pagliuco (he/him) to All Panelists: 02:34 PM

Thanks Kevin.....Michael Pollock and Shari's data with SRWC. I can send you the report that also looks at groundwater recharge, temps, riparian and habitat capacity increases.

From Heidi Perryman to Everyone: 02:39 PM

WOW

From Kate Lundquist to Everyone: 02:41 PM

Thank you Bennie! Great talk and thanks for the offer!!

From Irma Lagomarsino to Everyone: 02:42 PM

Bennie: Thank you for an excellent and inspiring example of progressive private land management.

From Me to Everyone: 02:49 PM

Partner with Pres. Biden's Rebuild infrastructure program!

From Heidi Perryman to Everyone: 02:49 PM

Yes!!!

From Anguleta Jouganatos-de Lopez to All Panelists: 02:54 PM

good book!

From John Downs to All Panelists: 03:03 PM

The Delta

From Kate Lundquist to Everyone: 03:17 PM

AWESOME JOE! Thank you!!!

From Nichole Fox to All Panelists: 03:17 PM

So great! Thank you Joe-

From Heidi Perryman to Everyone: 03:17 PM

Awesome Joe THANK youQ

From Me to Everyone: 03:18 PM

So many really profound ideas Joe, Thank you!

From Kevin Swift to All Panelists: 03:18 PM

I had to duck out at the end, Bennie, but super appreciate your repping Collins Pine. Stoked to keep working on those good lands.

From Heidi Perryman to Everyone: 03:18 PM

that was an ! Not a Q

From Kaitlyn Hernandez to All Panelists: 03:19 PM

Hi Susan, we can see your notes and not the main slide

well we see the slide but also the notes and its tiny

you have to make sure you're sharing the other presentation screen

From Kevin Swift to Everyone: 03:19 PM

Joe, I'm always stricken with jealousy after your talks. Fantastic high-level overview and strategic thinking. Much appreciate that big vision!

From Kaitlyn Hernandez to All Panelists: 03:20 PM

when you tell zoom to sharescreen it lets you choose which window to share

Its actually in the Zoom settings not powerpoint settings

From TroiCarleton to All Panelists: 03:23 PM

Click first on the body of the screen

From Andrew Baird to All Panelists: 03:23 PM

She has the remote screen control

From Heidi Perryman to Everyone: 03:34 PM

Depredation nd has a more difficult issue than harvest in California

From Kevin Swift to Everyone: 03:39 PM

Susan, that was great, way to illuminate the human/beaver nexus. I narrowly missed having the same presenter-view issue with my presentation, and you recovered so gracefully. Nice job!

From Me to Everyone: 03:40 PM

In Oregon licensed trapping does not encompass unregulated and unmonitored "predator" removal.

From Zane Eddy to All Panelists: 03:41 PM

Fantastic presentation and great work uncovering the human dimensions of beavers!

From Heidi Perryman to Everyone: 03:45 PM

i didn't understand that point? Charna can you explain?

From Rick Lanman to All Panelists: 03:46 PM

What tribal lands is the Scott River on?

From TroiCarleton to Everyone: 03:46 PM

Hi Heidi, which point?

From Brock Dolman to Everyone: 03:47 PM

Would the stream have been dry anyway and so the BDA was an unfortunate attractive nuisance?

From Kate Lundquist to Everyone: 03:47 PM

All of the above :)

From Maureen Donohoe to All Panelists: 03:47 PM

Pumping of water downstream

From TroiCarleton to Everyone: 03:47 PM

Rick, there is very little tribal lands within the Valley

From Brock Dolman to Everyone: 03:47 PM

Quartz Valley Tribe is one.

From Kevin Swift to Everyone: 03:47 PM

It's the beaver's fault! Those darn nuisance furry menaces!

From Bob Pagliuco (he/him) to Everyone: 03:47 PM

Rick - Shasta and Karuk...They also have the Quartz Valley Tribe on the Scott

From Maureen Donohoe to All Panelists: 03:47 PM

But they will blame the BDA makers

From Heidi Perryman to Everyone: 03:47 PM

I think the implication was that depredation Barriers lead to shooting?

From Irma Lagomarsino to Everyone: 03:47 PM

All parties are responsible. Reg agencies should figure out how to translocate stranded fish to better habitat.

From Bob Pagliuco (he/him) to Everyone: 03:48 PM

Stream would be dry due to diversions and drought, regardless of the BDA

From Brock Dolman to Everyone: 03:48 PM

Clearly a Straw Argument as in whose straw is sucking more water out...

From Nina Hemphill to Everyone: 03:48 PM

I vote for the irrigator exceeding water rights and reasonable water withdrawals

From Karen Pope to Everyone: 03:49 PM

Probably the land owner where the fish are found.

From Pamela Adams to All Panelists: 03:50 PM

In construction it's always The fence company(!) They always get screwed - left holding the bag. So would the upstream landowner who agreed to the BDA?

From Kate Lundquist to Everyone: 03:51 PM

Move the fish!

From Hope Woodward to All Panelists: 03:51 PM

yes, move

From Cooper Lienhart to Everyone: 03:51 PM

think outside the box!

From Maureen Donohoe to All Panelists: 03:51 PM

Create a better passage upstream to see if they can move on their own.

From Karen Pope to Everyone: 03:51 PM

Allow them to perish, the population will be better off with the BDAs in place.

From Brock Dolman to Everyone: 03:52 PM

again would there even be habitat & fish at all without the BDA to begin with? Is it blaming the victim BDA? Hmm?

From Anguleta Jouganatos-de Lopez to All Panelists: 03:52 PM

endangered-move fish

From TroiCarleton to Everyone: 03:52 PM

What does think outside the box mean? Ideas??

From Hope Woodward to All Panelists: 03:53 PM

Is there some other technology to temporarily help them to pass the BDA

From Barbara Gallios to All Panelists: 03:53 PM

Put a tube through the dam so the fish can swim down stream but leave the dam in place.

From Kevin Swift to Everyone: 03:53 PM

I'm too much of a sucker—move the fish upstream by hand, keep the BDA

From Cooper Lienhart to Everyone: 03:53 PM

create a sort of side channel for fish passage

From Irma Lagomarsino to Everyone: 03:53 PM

Great presentation and work!

From Me to Susan Charnley: (Privately) 03:55 PM

Hi Susan, I'm so glad you shared your presentation with me - that worked OK - Jeff

From Zane Eddy to All Panelists: 03:55 PM

Fantastic job on everything y'all've been doing and great presentation!

From Melvyn Herrick to All Panelists: 03:55 PM

Loving all the talk about taking risks, being flexible and staying committed!

From Brock Dolman to Everyone: 03:59 PM

Link to here to download the OAEC Beaver in California: Creating a Culture of Stewardship:
<https://oaec.org/publications/beaver-in-california/>

From Maureen Donohoe to All Panelists: 04:01 PM

Kate where is the project in West Marin?

From Brock Dolman to Everyone: 04:02 PM

We are doing a general assessment in several West Marin watersheds in the greater Tomales bay watershed and Pine Gulch.

From Maureen Donohoe to All Panelists: 04:03 PM

Why is there no numbers management? Who would traditionally be in charge of those numbers? weren't they almost pushed to extinction at one time?

From Brock Dolman to Everyone: 04:04 PM

<https://www.inaturalist.org/>

From Maureen Donohoe to All Panelists: 04:04 PM

Because their numbers are so much lower than before would they be eligible for protection and thus be able to be re-located?...restored?

From Heidi Perryman to Everyone: 04:06 PM

The population is lower. But it is resilient and so they are not in danter'
danger

From Kevin Swift to Everyone: 04:07 PM

Yay Betsy, Scott River is such a bunch of champions. I'll double down on Brock's comments—you've gotta see the place and their build! Big, crazy wrecked riverscape and they fully stepped up to the challenge.

From Heidi Perryman to Everyone: 04:09 PM

Wildlife services only depredates a potion of the beavers that are killed each year, about half now.

From Charnna to Everyone: 04:12 PM

Nice job, Kate!

From Stuart Suplick to All Panelists: 04:12 PM

Thanks for all these updates, Kate!

From Zane Eddy to All Panelists: 04:13 PM

Great job covering the policy stuff around relocation!

From Kevin Swift to Everyone: 04:14 PM

Well, maybe I'm biased, but I loved your talk, Kate. Good presentation of a very thorny issue!

From Kate Lundquist to All Panelists: 04:15 PM

Awww thanks Kev and thanks Zane!

From Maureen Donohoe to All Panelists: 04:17 PM

Thank you Kate great presentation!

From Me to Everyone: 04:20 PM

Such an inspirational story!

From Jessica Doran to All Panelists: 04:25 PM

Thanks for sharing! This is a wonderful example of biocultural restoration. People helping nature and nature helping people.

From Kaitlyn Hernandez to All Panelists: 04:26 PM

this is a lovely story thank you all for sharing what you do

From Dr. Emily Fairfax (she/her) to All Panelists: 04:28 PM

That was great!

From Irma Lagomarsino to Everyone: 04:29 PM

These beaver meetings are never dull.

From Kevin Swift to Everyone: 04:30 PM

Right on Cooper! Thanks for such a rootsy, human look at the joy of doing right by our waters and beavers! Great work in the hot dry lands—makes me feel so lucky up here in Nor Cal.

From Kaitlyn Hernandez to All Panelists: 04:32 PM

How do beaver dams/ponds influence water quality? especially in areas with agricultural run-off

From Heidi Perryman to Everyone: 04:33 PM

Beaver dams have been shown to remove nitrogen

From Maureen Donohoe to All Panelists: 04:33 PM

Heidi where did you get that from? Thank you

From Heidi Perryman to Everyone: 04:33 PM

Improve water quality, in fact there's a new study in Iowa just started to look at this in the area

From Kate Lundquist to All Panelists: 04:33 PM

Nice work Cooper and Audrey! Go SLO Beaver Brigade!!!

From Kevin Swift to Kaitlyn Hernandez, All Panelists: 04:34 PM

There's a pretty cool study re: nutrient loads in Taylor Creek, Tahoe:

From John Downs to All Panelists: 04:35 PM

CDFW through its prop 1 & prop 68 watershed restoration grant program. We funded child's meadow

<https://wildlife.ca.gov/Explore/Organization/WRGB>

From Kevin Swift to Kaitlyn Hernandez, All Panelists: 04:35 PM

Oops—lemme stick the link in here...

From Heidi Perryman to Everyone: 04:35 PM

East research a few years back repeated several studies. I'll look up the name

From John Downs to All Panelists: 04:35 PM

We have mine for BDAs

From Kevin Swift to Kaitlyn Hernandez, All Panelists: 04:35 PM

<https://scholarworks.calstate.edu/concern/theses/9c67wq07d>

From John Downs to All Panelists: 04:35 PM

money

From Heidi Perryman to Everyone: 04:36 PM

Rhode Island research by Arther gold

From Kate Lundquist to John Downs, All Panelists: 04:36 PM

That's great John, can you mention that to all attendees?

From Dr. Emily Fairfax (she/her) to Everyone: 04:37 PM

For people requesting specific papers/studies: the Beaver Institute maintains a reading library with lots of links! <https://www.beaverinstitute.org/research/library/>

From Kaitlyn Hernandez to All Panelists: 04:38 PM

Thank you! this is perfect.

From Betsy Stapleton to John Downs, All Panelists: 04:40 PM

Hi John, This Betsy at the Scott River Watershed Council. Tell me more about "money for BDAs"...

From Cooper Lienhart to Everyone: 04:41 PM

same question here!

From Joe Wheaton to Everyone: 04:49 PM

Here's the slides about how to use that form Kate was talking about:

<http://brat.riverscapes.xyz/Workshops/2018/johnday.html#brat-capacity-modelling> and here's the form: <https://usu.box.com/s/6ku7lczuinvjh4s0o16alji0mbh4eacl> Also, there is an exercise in Module 3 of LTPBR stuff: <http://lowtechpbr.restoration.usu.edu/workshops/2020/SGL/Modules/module3#e-risk-assessment-condition-assessment--recovery-potential>

From Kate Lundquist to Everyone: 04:52 PM

Here is a link to the entire Recruitment Strategy we did where we found the remnant dam, It mentions the other remnant dams from the 80s as well <https://oaec.org/publications/beaver-recruitment-strategy-for-tasmam-koyom/>

That link also has a link to the 10 page report on recognizing signs by Sabra Purdy as well.

From Betsy Stapleton to Everyone: 04:54 PM

With BDAs and the water right issue- consider implementing after the irrigation season to ensure that that "wait out phase" doesn't interrupt irrigation.

From Kate Lundquist to Everyone: 04:56 PM

Joe Wheaton, are you guys still doing BDAs with pond levelers with irrigation gates to address water concerns?

From Heidi Perryman to Everyone: 04:59 PM

Riparian Highway! I labhe chink ove that idea! And we can the counties where beaver are not recovered and the high way needs to go to THERE

Building the riparian highway is my new passion

From John Downs to All Panelists: 05:00 PM

This valley is ripe for restoration Dropped pin

<https://goo.gl/maps/TzVfen9KWYJXCyV18>

From Bob Pagliuco (he/him) to Everyone: 05:00 PM

One thing I forgot to mention regarding permit streamlining for beaver restoration and bdas.....I am working on renewing the NOAA RC programmatic Biological Opinion for Northern CA and both BDAs and beaver restoration will be included!

From Susan Charnley to All Panelists: 05:01 PM

Sorry but I have another commitment at 5, didn't realize in advance you wanted us to remain until 6. So thank you for including me, and sorry - I have to go! I've loved being involved in this summit and learned so much from all of these great presenters!

From Kate Lundquist to All Panelists: 05:01 PM

Thanks Susan!!!

From Jackie Van Der Hout to All Panelists: 05:02 PM

Thanks so much!

To everyone else~ staying until 6 is completely optional and we really appreciate everything you've shared today to make this happen!

From Betsy Stapleton to Everyone: 05:03 PM

I need to go feed the cows.....and

Move the irrigation. Thanks for having me!

From Dr. Emily Fairfax (she/her) to All Panelists: 05:03 PM

I will also have to run soon - sorry! Feel free to point people to my website or twitter or email if they have questions specifically for me

From Kate Lundquist to All Panelists: 05:03 PM

Thanks Betsy!!

From Joe Wheaton to Everyone: 05:05 PM

Yay Napa!

Hi Kate... funny enough we haven't had to follow through on installation of pond levelers with BDAs to address irrigation concerns downstream. Instead, simply offering to install them to mitigate concerns if they are realized as part of an adaptive management plan. Because the projects did not produce the feared impacts downstream, they were not necessary. A good listening / negotiating strategy and committing to mitigating concerns if realized.

From Rick Lanman to All Panelists: 05:05 PM

We have beaver dams in San Jose and Los Gatos, California too now¹

From Heidi Perryman to Everyone: 05:09 PM

If we never allowed relocation we could still make a HUGE difference by not killing so many

From Dr. Emily Fairfax (she/her) to All Panelists: 05:10 PM

Thanks for the great summit and discussion everyone! I have reservations at a campground tonight and need to hit the road.

From Nina Hemphill to Everyone: 05:10 PM

I have to go soon.

From Jordan Vermillion to Everyone: 05:10 PM

Yes Kate!

From Me to All Panelists: 05:10 PM

Thank you so much Emily!

From Heidi Perryman to Everyone: 05:10 PM

Thanks Emily and great job@

From Elijah Portugal to Everyone: 05:10 PM

There needs to be more environmental scientist positions related to beaver planning in CDFW for managing coordination between branches.

From Cooper Lienhart to Everyone: 05:11 PM

Bye Emily! Always great to hear you present!

From Bennie Johnson to Everyone: 05:13 PM

Our partners have had success with grant programs funded by Prop1 and 68 in CA for use with BDAs. Also grants related to carbon storage and stream flow enhancement.

From Kevin Swift to Everyone: 05:14 PM

Thanks a bunch Nina!

Drive safe, Emily—such a delight to see you present in person

From Stuart Suplick to All Panelists: 05:15 PM

Thank you all for your presentations. Great information and updates for beaver/PBR research (and that's an understatement)

From Garrett Liles to All Panelists: 05:15 PM

Great meeting all around. Keep spreading the good word about Beavers! We had one in Big Chico Creek this year and it created a positive benefits!

From Joe Wheaton to All Panelists: 05:15 PM

Check out: <https://www.blueforest.org/>

From Kaitlyn Hernandez to All Panelists: 05:18 PM

this is so real I appreciate the soberness in how real it is to think in long-term and ecologically relevant time

From Nina Hemphill to Everyone: 05:20 PM

this has been a great meeting thank you!!. Can you send the links folks have put in the chat and questions.

From Jackie Van Der Hout to Everyone: 05:20 PM

We will have this available on our website in a few days!

From Nina Hemphill to Everyone: 05:21 PM

thanks!!

From Elijah Portugal to Everyone: 05:21 PM

Thanks for the great discussion all.

From Heidi Perryman to Everyone: 05:22 PM

It will be on the website as soon as possible with the chat notes as well

From John Downs to All Panelists: 05:29 PM

Hi Kate yes I can

From Eddie Corwin to All Panelists: 05:30 PM

How much \$ per beaver would a farmer want to keep them on their property?

From Joe Wheaton to Everyone: 05:30 PM

Don't forget... it is a magic trick... storage is deceiving, but one that is familiar. They know what snowpack does... and they know its diminishing. This mimics that function.

From John Downs to All Panelists: 05:31 PM

Here's e link for a grant program that gives money for BDAs

<https://wildlife.ca.gov/Explore/Organization/WRGB>

From Kate Lundquist to Everyone: 05:32 PM

Hi Eddie! Nice to see you on here!! Great question. I know some have talked about conservation offsets for beaver conservation but not sure if they have been implemented anywhere. Want to raise your hand and ask the group?

From Joe Wheaton to Everyone: 05:34 PM

Amen Kevin.

From Lauren Sullivan to Everyone: 05:36 PM

I'm not seeing the link

From Joe Wheaton to Everyone: 05:36 PM

<https://wildlife.ca.gov/Explore/Organization/WRGB>

From Bob Pagliuco (he/him) to Everyone: 05:36 PM

Childs Meadow was funded through this source, correct?

From Kate Lundquist to Everyone: 05:36 PM

John can you put your email in the chat?

From John Downs to All Panelists: 05:37 PM

John.downs@wildlife.ca.gov

<https://wildlife.ca.gov/Explore/Organization/WRGB>

Yes we provided money for child's meadow

From Bennie Johnson to Everyone: 05:37 PM

Childs Meadow has grants from the CDFW GHG grant, SNC forest health grant, we just applied for a CDFW Prop 1 grant, and we have also have a CalFire CCI grant. I believe USFWS partners program funds were also used at Childs.

From Kevin Swift to Everyone: 05:38 PM

Eddie, that's a great way of framing the question. It works in both directions too—how much is water worth to a farmer if their crops can't survive without it? Equally, what's it costing that guy to pump water, and how much cheaper would that be for each foot the water table rises, based on KW/hr cost and the weight of water, etc.?

From Kate Lundquist to Everyone: 05:38 PM

Elijah has a great question: Is anyone aware of dedicated positions within the USFS or USFWS in CA for tracking beaver populations that is not related to depredation?

From Kate Wilcox to Everyone: 05:39 PM

Thank you for the encouragement on the San Joaquin. Currently in Fresno, and there is one beaver dam on a tributary of the San Joaquin that stands between the Creek Fire and salmon restoration. It gives hope.

From Virginia Holsworth to All Panelists: 05:40 PM

If anyone is interested in urban beavers, Fairfield has a complex that I have been follow for about a year now. All dams have been documented on iNaturalist and I have a Facebook group called Laurel Creek Beavers.

From Kaitlyn Hernandez to All Panelists: 05:44 PM

Thank you everyone, its people like you all that give me hope in a time where we are greatly lacking it.

From John Downs to All Panelists: 05:45 PM

Our program can fund monitoring only if tied to implementation

From Heidi Perryman to Everyone: 05:49 PM

YES! What Marjorie said!

From Elijah Portugal to Everyone: 05:54 PM

Does anyone know of any examples or recommendations for implementing large-scale, or statewide investment in short-duration, repeat lidar or aerial imagery acquisition for restoration effectiveness monitoring?

From Kate Lundquist to Everyone: 05:55 PM

Karen's lab works with LIDAR a lot...

From John Downs to All Panelists: 05:56 PM

<https://wildlife.ca.gov/Explore/Organization/WRGB>. Find the 2021 solicitation at this address. If you can make it fit into a planning project then we have \$\$

From Karen Pope to Everyone: 05:57 PM

The FS is doing some large-scale LiDAR on the Forests. It's been great for restoration planning. Game changer.

From Rachel Friesen to All Panelists: 05:57 PM

As someone who's thinking of returning to grad school in the upcoming years, what do you all think are the most pressing research needs are in the realm of beaver restoration?

From John Downs to All Panelists: 05:57 PM

From Kate Lundquist to Everyone: 06:00 PM

Thanks all for a GREAT Summit!!!

From Karen Pope to Everyone: 06:00 PM

Loved all the talks today. Great job everyone! Let's ride the wave...

From Rachel Friesen to All Panelists: 06:00 PM

Thank you all!

From Lauren Sullivan to Everyone: 06:01 PM

Thank you everyone who put this on!

From Zane Eddy to All Panelists: 06:01 PM

Its been great y'all

From Eddie Corwin to All Panelists: 06:01 PM

AMAZING

From Andrew Baird to All Panelists: 06:01 PM

Thank you!
